

120 Watt Photovoltaic Module

EVERLIGHT ELM-120P Series

EVERLIGHT ELM-120P is designed specifically for on-grid residential systems where a combination of high module efficiency and outstanding appearance is desirable. Utilizing 36 cells (150 x 150mm) configured geometrically in a 9 x 4 matrix connected in series. An anti-reflective coating, provides a uniform blue color and increases the absorption of light in all weather conditions. Designed to withstand rigorous wither conditions; the multifunctional junction box avoids from eroding by moisture or humidity; torsion -proof, anodized and corrosion -free aluminum frame tightened by inner corner without using any screws, making EVERLIGHT ELM-120P great appearance and less power decrease during warrant period.
